

Developer interns

The Plain English Foundation is looking for interns for a full-time 3-6 month paid internship to develop and support our range of webs/applications, maintain and strengthen our online presence.

We are a dynamic and enterprising business that delivers writing training and editing services.

You're looking to build on your professional experience in a creative and stimulating job. You also want to showcase your talents in IT.

You have demonstrable professional experience like:

- developing PHP/Java/Grails based webs/applications
- operating in an Unix and/or Linux environment
- collaborating with business users, designers and or other developers
- coding, documenting or participating in design reviews according to standards
- shell scripting, SQL queries and report generation
- working in all phases of the software development life cycle

You have great communication skills and:

- have — or will soon have — a degree from an Australian university in information systems and/or technical communication
- excellent spoken and written English
- enjoy writing quality how-to tips, guidelines and reports
- like to work in team, as well as working solo
- know why plain English matters to everyone, especially an IT creative
- have a polished phone manner.

You are very organised and work well under tight deadlines, and:

- can handle busy workflow demands without flinching
- have a high attention to detail and can quickly spot mistakes
- can prioritise tasks to do what you need to in the time you've got
- enjoy problem solving and trouble shooting
- like helping people understand IT systems and processes
- will happily follow our workplace policies.

Conditions

- Salary up to \$800 per week (on average) for a minimum 38 hour week
- Based at our Sydney CBD office

Applications close on **Monday 6 February**.
